

FREE CEUs FOR CSRT MEMBERS!!

Beginning March 1, 2005, through February 28, 2006, new and renewing CSRT members will receive 2 FREE On Line Continuing Education Units! Every member will have the opportunity to go to the "CE On Line" page on the CSRT web site. Instructions will be mailed to you along with your new membership card.

Technologists have been asking for a "tangible" reason to join their professional organization for years. Although CSRT considers it's many educational seminars and legislative activities extremely important, it has been a difficult message to sell. A recent collaboration with RT Portal and EduMed has made it possible to provide On Line Continuing Education for anyone entering the CSRT Web site. With their support, CSRT has developed this exciting membership benefit. Each time the member returns to the site for additional CE, CSRT will earn a percentage back. The more you use the page, the more CSRT will be ensured of it's ability to continue to provide the leadership, legislative grass roots, and educational programs necessary to move into a true "professional" status.

Technologists across the state continue to search for valuable and interesting CE to meet the new continuing education requirements set by the RHB last year. "The CSRT Experience," registers up to 150 technologists at each of its events around the state. This 6 CE, Saturday Seminar has been very successful, as was the Annual Meeting in San Diego. Now members can go on line and get 2 units for free! There is no question CSRT is BACK!

Included in your *Technigram* is a new member application. Encourage your co workers to join today. Together...we will make a difference!
