## **Radiologic Technology Educators of California**

May 3, 2006

Dear Program Director,

I am writing on behalf of the Radiologic Technology Educators of California (RTEC). The goal of RTEC is to keep you informed of educational matters affecting California's Radiologic Technologists. We place particular emphasis on keeping you informed of legislative issues, however, we are also student advocates and to that end we have created the "Golden Apple Award" and the "Student Bowl."

The Golden Apple Award is designed to recognize that special student, one who exemplifies the ideals of the Radiologic Technology profession. One who represents his/her peers, your program, and the radiology profession with competency, dependability, integrity, loyalty and professionalism.

We invite you to nominate a student in your program who displays all of these traits. Please complete the attached application and return it to RTEC by July 15<sup>th</sup>, 2006. The winner will be awarded conference registration fees for the next RTEC conference at the Renaissance montura Hotel in Los Angeles on November 2<sup>nd</sup> and 3<sup>rd</sup>, 2006, along with round trip transportation and lodging, a cash award, and the Golden Apple Trophy.

The Student Bowl is being sponsored by RTEC but held during the CSRT conference immediately following the RTEC conference, November 4<sup>th</sup> & 5<sup>th</sup>, 2006 also at the Renaissance Montura Hotel in Los Angeles. This fun and rewarding student game is open to all current radiology students and is a way for them to practice for their upcoming board examinations. Cash prizes will be awarded the winners! Please have your students attend the CSRT conference and take part in the Student Bowl.

Take pride in your students and your program. Nominate an outstanding student for the Golden Apple award and let all your students know about the Student Bowl. I know we at RTEC are all proud of you and your efforts to make our profession the best it can be.

Sincerely,

Diane R. Garcia, BS, CRT, RT (R)(CT)  
RTEC President
